

OCAD AG - a small Swiss software company - has developed the cartography software OCAD, which is used worldwide in cartography and orienteering sports and is continuously adapted to new customer requirements. In order to expand our OCAD App, the team is looking for reinforcement. Therefore, we are looking for a

Software Developer 20-60% or project based

Your tasks will include the further development of the new OCAD App.

Your qualifications:

- Degree in computer science with focus on software development or comparable experience
- Good knowledge of the programming language C#.NET, additional knowledge of PHP, SQL and Delphi is an advantage
- First experiences in the implementation of geoinformatics projects
- Experience in cross-platform software development for Windows, MacOS, iOS and Android
- Experience in UI/UX design
- Personal relation to orienteering is an advantage

You will be an ideal addition to the motivated OCAD team if you are full of ideas, creative, have a good feel for dealing with our international customers and have an entrepreneurial mindset. You can expect a challenging and exciting role in an international market with plenty of room for initiative and personal responsibility.

The OCAD office is located in Baar, Switzerland. Remote working is largely possible. Start date to be agreed.

We look forward to receiving your application by email. Please note that we only consider direct applications and do not accept offers from recruitment agencies.
